

- A unit owner inquired about recycling. It was explained that recycling is expensive, the trucks damage the asphalt and a list of nearby recycling centers had been provided earlier in the year to all unit owners. Owners were also reminded that garbage cans should not be placed at the curb before 5:00 p.m. the night before trash pick-up.
- Another owner inquired about the water shut-off valves. It was explained that every building has one exterior valve and each individual unit has their own shut-of valve. A special key was purchased earlier in the year for exterior shut-off valves.

Pat Rogers motioned to adjourn the meeting and Jan Hauger seconded the motion. The motion passed unanimously. The meeting was adjourned at 8:00 p.m.
